

TERMS OF REFERENCE

SYSTEM DEVELOPMENT OF ONLINE BUSINESS PERMIT AND LICENSING SYSTEM WITH TREASURY INTEGRATION

I. PROJECT TITLE

System Development, Implementation, and Maintenance of an Online Business Permit and Licensing System (eBPLS) with Integrated Treasury Collection System

II. PROJECT BACKGROUND

The Local Government Unit (LGU) intends to develop and implement an integrated **Online Business Permit and Licensing System (eBPLS)** to modernize, streamline, and automate the processing of business permits and related transactions.

The project shall support the implementation of **Republic Act No. 11032**, otherwise known as the **“Ease of Doing Business and Efficient Government Service Delivery Act of 2018,”** which promotes simplified requirements, streamlined procedures, transparency, efficient government service delivery, and reduction of unnecessary regulatory burdens.

RA 11032 specifically covers Local Government Units and requires LGUs to streamline the issuance of business licenses, clearances, permits, certifications, and authorizations. It further provides for the use of a single or unified business application form, establishment of a Business One Stop Shop (BOSS), automation or electronic BOSS, electronic versions of permits and related documents, and mechanisms that facilitate efficient business permit processing.

In support of these requirements, the proposed system shall provide an **online portal for business registration and permit processing**, together with an internal LGU system for assessment, evaluation, approval, payment, releasing, reporting, and monitoring.

The system shall also be integrated with the **Municipal Treasury Collection System** to provide a unified and reliable mechanism for recording and monitoring government collections, including but not limited to:

1. Business Permit and Licensing Fees;
2. Business Taxes;
3. Regulatory Fees;

4. Miscellaneous Fees;
5. Government Stall Rental;
6. Franchise Payments;
7. Other Treasury collections;
8. Daily Collection transactions; and
9. Other revenue-generating transactions that may subsequently be included by the LGU.

The integration is intended to eliminate duplicate encoding, improve collection monitoring, provide accurate financial records, and allow the Treasurer's Office to generate reliable collection reports.

III. LEGAL AND POLICY BASIS

The development and implementation of the system shall be guided by applicable Philippine laws, rules, regulations, and government standards, including, but not limited to:

1. Republic Act No. 11032

Ease of Doing Business and Efficient Government Service Delivery Act of 2018

The system shall support the requirements of RA 11032 relating to:

- Simplification of government procedures;
- Reduction of red tape;
- Transparency in government transactions;
- Unified business application;
- Business One Stop Shop (BOSS);
- Electronic Business One Stop Shop (e-BOSS);
- Automation of Business Permit and Licensing System;
- Electronic submission and processing;
- Electronic payment;
- Electronic issuance of permits and clearances;
- Streamlined business permitting;
- Monitoring of processing time; and
- Improved delivery of government services.

Section 11 of RA 11032 requires LGUs to implement streamlined procedures for the issuance of business licenses, clearances, permits, certifications, and authorizations and provides for automation or establishment of an electronic BOSS.

2. Republic Act No. 7160

Local Government Code of 1991

The system shall support the LGU's authority and responsibility in the administration, assessment, collection, recording, and reporting of local taxes, fees, charges, and other revenues.

3. Republic Act No. 10173

Data Privacy Act of 2012

The system shall implement appropriate organizational, physical, and technical safeguards for the protection of personal information and business-related data.

4. Republic Act No. 8792

Electronic Commerce Act of 2000

The system shall support electronic transactions and electronic documents where applicable.

5. Applicable ARTA Rules, Regulations, Standards, and Guidelines

The system shall be designed to support applicable requirements and standards issued by the **Anti-Red Tape Authority (ARTA)** concerning ease of doing business, process streamlining, Citizen's Charter, processing time, and regulatory management.

ARTA's tools emphasize identifying administrative activities, processing time, direct costs, and opportunities to eliminate unnecessary steps in government transactions.

6. Applicable DILG, DICT, BLGF, DOF, BIR, BFP, and Other Government Issuances

The system shall comply with applicable rules, circulars, technical standards, reporting requirements, and policies issued by concerned national government agencies.

IV. PROJECT OBJECTIVES

The project aims to develop and implement an integrated Online Business Permit and Licensing System that will:

1. Provide a convenient online platform for business registration, application, renewal, assessment, payment, and release of business permits;
 2. Automate the Business Permit and Licensing System of the LGU;
 3. Establish an electronic Business One Stop Shop (e-BOSS) environment;
 4. Implement a unified business application process;
 5. Reduce manual encoding and repetitive submission of information;
 6. Reduce processing time and unnecessary steps in business permit transactions;
 7. Provide transparent monitoring of application status;
 8. Allow applicants to track their applications online;
 9. Provide electronic assessment of taxes, fees, and charges;
 10. Provide electronic payment facilities;
 11. Generate electronic business permits and related documents;
 12. Integrate business permit transactions with the Treasury Collection System;
 13. Automate recording of collections;
 14. Prevent duplicate encoding of collection transactions;
 15. Provide accurate and timely collection reports;
 16. Provide management dashboards and monitoring tools;
 17. Establish an audit trail for business and financial transactions;
 18. Improve accountability among system users;
 19. Provide reliable data for financial reporting and management decision-making; and
 20. Provide a scalable system capable of supporting additional LGU revenue transactions in the future.
-

V. SCOPE OF WORK

The service provider/developer shall be responsible for the **analysis, system design, development, customization, integration, testing, deployment, training, documentation, implementation, and technical support** of the Online Business Permit and Licensing System with Treasury Integration.

The system shall consist of, but shall not be limited to, the following major components:

VI. ONLINE BUSINESS PERMIT AND LICENSING SYSTEM

A. Public/Business Applicant Portal

The system shall provide an online portal accessible to business owners/applicants.

The portal shall allow applicants to:

1. Create an account;
2. Log in securely;
3. Register business information;
4. Submit new business permit applications;
5. Submit renewal applications;
6. Encode required business information;
7. Upload required supporting documents;
8. View documentary requirements;
9. View applicable taxes, fees, and charges;
10. View assessment results;
11. Submit applications electronically;
12. Monitor application status;
13. Receive system notifications;
14. Receive notices for deficiencies or required corrections;
15. Make online payments, when enabled;
16. Download/print official electronic documents;
17. Download approved business permits;
18. View transaction history; and
19. Track the status and progress of their application.

VII. BUSINESS PERMIT APPLICATION MODULE

The system shall provide a centralized application module for new and renewal applications.

Required features:

- New Business Application;
- Business Renewal;
- Amendment/Change of Business Information;
- Closure/Retirement of Business;
- Transfer/Relocation of Business;
- Additional Line of Business;
- Branch/Extension application;
- Application history;
- Document submission;
- Document validation;
- Application status monitoring;
- Application tracking number;
- QR Code or verification mechanism; and
- Application audit trail.

The system shall maintain a complete record of each business and its corresponding transactions.

VIII. UNIFIED BUSINESS APPLICATION FORM

The system shall provide a **Single/Unified Business Application Form** containing the required information from concerned LGU offices and departments.

The system shall avoid repetitive encoding by allowing information entered by the applicant to be shared with authorized offices concerned with the processing of the application.

The unified application shall support, where applicable:

- Business owner information;
- Business name;
- Business address;

- Nature of business;
 - Line of business;
 - Capital investment;
 - Gross sales/receipts;
 - Number of employees;
 - Establishment information;
 - Building information;
 - Zoning information;
 - Sanitary information;
 - Local tax information;
 - Regulatory requirements;
 - Fire Safety requirements; and
 - Other LGU requirements.
-

IX. ASSESSMENT AND COMPUTATION MODULE

The system shall automatically compute applicable taxes, fees, and charges based on the approved LGU Revenue Code, applicable ordinances, resolutions, and other legal bases.

The module shall support:

1. Business Tax;
2. Regulatory Fees;
3. Mayor's Permit Fees;
4. Sanitary Fees;
5. Zoning/Locational Fees;
6. Garbage Fees;
7. Health Fees;
8. Fire-related charges where applicable;
9. Barangay-related clearances/fees where applicable;
10. Miscellaneous fees;
11. Other locally imposed taxes and fees; and
12. Other assessment items configured by authorized LGU personnel.

The system shall allow authorized administrators to configure:

- Tax rates;
- Fee rates;
- Billing groups;

- Line items;
- Assessment rules;
- Exemptions;
- Discounts;
- Penalties;
- Surcharges;
- Interest;
- Regulatory fees; and
- Other applicable charges.

All changes to assessment rules shall be recorded in an audit trail.

X. PER LINE-OF-BUSINESS ASSESSMENT

The system shall maintain assessment information **per line of business**.

Each business shall be capable of having multiple lines of business, and the system shall identify the corresponding:

- Business tax;
- Regulatory fees;
- Other applicable fees;
- Gross sales;
- Capital;
- Assessment basis; and
- Payment status

for each line of business where applicable.

The Taxpayer/Business Account Card shall provide sufficient details to identify the assessment and payment history of each line of business.

XI. APPLICATION WORKFLOW

The system shall implement a configurable workflow such as:

Applicant → Application Review → Assessment → Evaluation → Approval → Payment → Releasing

The LGU shall be able to configure the workflow according to its approved Citizen's Charter and internal procedures.

The system shall record:

- Date and time of submission;
 - Date and time received;
 - User who processed the transaction;
 - Action taken;
 - Date and time of action;
 - Deficiencies;
 - Corrections;
 - Approval/disapproval;
 - Assessment;
 - Payment; and
 - Release.
-

XII. ROLE-BASED USER MANAGEMENT

The system shall implement role-based access control.

Possible user roles shall include:

1. System Administrator

Full administrative access, including:

- User management;
- Role management;
- System configuration;
- Taxes and fees;
- Billing groups;
- Line items;
- Reports;
- Audit trail;
- System parameters.

2. Application Officer

Access to:

- Application processing;
- Applicant/business information;

- Document validation;
- Application review.

3. Assessment Officer

Access to:

- Assessment;
- Computation;
- Capital;
- Gross sales/receipts;
- Applicable taxes and fees;
- Assessment reports.

4. Approving Officer

Access to:

- Review;
- Approval/disapproval;
- Reassessment where authorized;
- Application status.

5. Payment Officer/Cashier

Access to:

- Payment transactions;
- Collection recording;
- Official receipts;
- Payment verification;
- Collection reports.

The Payment Officer shall not have authority to modify the system's taxes, fees, billing groups, or assessment configuration unless specifically authorized.

6. Releasing Officer

Access to:

- Permit release;
- Printing/downloading of permits;
- Release verification;
- Permit status.

7. System Administrator

Access to:

- Treasury collections;
 - Revenue transactions;
 - Daily collections;
 - Miscellaneous collections;
 - Rental;
 - Franchise payments;
 - Collection reports.
-

XIII. TREASURY INTEGRATION

A major component of the project shall be the integration of the Online Business Permit and Licensing System with the **Treasury Collection System**.

The integration shall provide a centralized mechanism for transmitting assessed and paid transactions from the Business Permit System to the Treasury System.

The integration shall minimize or eliminate duplicate encoding of transactions.

XIV. BUSINESS PERMIT COLLECTION INTEGRATION

Once an assessment is finalized, the assessment information shall be transmitted to the Treasury Collection System.

The Treasury System shall receive, where applicable:

- Taxpayer/business information;
- Business permit number;
- Application number;
- Assessment number;
- Line of business;
- Tax type;
- Fee type;
- Amount assessed;
- Penalty;
- Interest;
- Discount;

- Total amount due;
 - Payment reference;
 - Payment date;
 - Receipt number;
 - Payment status; and
 - Other necessary transaction information.
-

XV. DAILY COLLECTION SYSTEM

The integrated Treasury System shall provide a **Daily Collection Module** for recording and monitoring all collections received by the LGU.

The system shall support daily collection transactions from different revenue sources.

Examples include:

A. Business Permit Collections

- Business taxes;
- Regulatory fees;
- Mayor's permit fees;
- Other business-related fees.

B. Miscellaneous Fees

The system shall support collection of miscellaneous fees and charges imposed by the LGU, including configurable revenue items.

C. Government Stall Rental

The system shall provide a module for:

- Stall registration;
- Stall assignment;
- Stall occupant/lessee information;
- Rental assessment;
- Monthly rental;
- Penalty/interest where applicable;
- Payment;
- Outstanding balances;
- Collection history;
- Rental account status; and

- Rental collection reports.

D. Franchise Payments

The system shall support:

- Franchise registration;
 - Franchise holder information;
 - Franchise type;
 - Franchise number;
 - Payment assessment;
 - Payment recording;
 - Renewal/payment monitoring;
 - Outstanding obligations;
 - Payment history; and
 - Franchise collection reports.
-

XVI. TREASURY REVENUE ACCOUNT MANAGEMENT

The system shall provide a centralized taxpayer/customer account where applicable.

The account shall contain:

- Taxpayer/customer information;
 - Transaction history;
 - Assessment history;
 - Payment history;
 - Outstanding balances;
 - Official receipt information;
 - Revenue type;
 - Transaction date;
 - Payment status; and
 - Related supporting documents.
-

XVII. PAYMENT MODULE

The system shall support payment processing through:

A. Over-the-Counter Payment

Cashier/Treasury personnel shall be able to process payments and issue the corresponding official receipt or electronic receipt/document as authorized by the LGU.

B. Online Payment

Where available and authorized, the system may integrate with accredited payment gateways or channels.

The system shall support payment reference numbers and payment confirmation.

Possible payment channels may include, subject to LGU approval and availability:

- Banks;
 - E-wallets;
 - Payment gateways;
 - Online banking;
 - Other authorized electronic payment channels.
-

XVIII. OFFICIAL RECEIPT / PAYMENT DOCUMENT

The system shall generate the appropriate payment document based on applicable government rules and the LGU's authorized receipt system.

The system shall capture:

- Receipt number;
- Date;
- Payer;
- Transaction;
- Revenue account;
- Amount;
- Payment method;
- Cashier;
- Reference number; and
- Other required information.

The system shall prevent unauthorized alteration or duplication of receipt records.

XIX. COLLECTION REPORTING

The system shall generate reports required by the Treasurer's Office and other authorized offices.

Reports shall include, but not be limited to:

Business Permit Reports

1. Business Tax Collection;
2. Regulatory Fee Collection;
3. Business Permit Collection;
4. Paid Masterlist;
5. Unpaid Masterlist;
6. Collectibles;
7. Breakdown of Collectibles;
8. Taxpayer Account Card;
9. Assessment Summary;
10. Payment Summary;
11. Daily Collection;
12. Monthly Collection;
13. Annual Collection;
14. Collection by Revenue Account;
15. Collection by Business;
16. Collection by Line of Business;
17. Collection by Cashier;
18. Collection by Payment Method.

Treasury Reports

19. Daily Collection Report;
20. Abstract of Collection;
21. Collection by Revenue Source;
22. Miscellaneous Fee Collection;
23. Government Stall Rental Collection;
24. Franchise Payment Collection;
25. Outstanding Receivables;
26. Rental Collectibles;
27. Franchise Collectibles;
28. Payment History;

- 29. Cashier Collection Report;
- 30. Collection Summary by Date;
- 31. Collection Summary by Revenue Account;
- 32. Collection Summary by Fund; and
- 33. Other reports required by the LGU.

Reports shall support filtering by:

- Date;
 - Month;
 - Year;
 - Revenue source;
 - Tax type;
 - Business;
 - Taxpayer;
 - Cashier;
 - Payment status;
 - Fund;
 - Barangay;
 - Line of business; and
 - Other applicable parameters.
-

XX. ABSTRACT OF COLLECTION

The system shall provide an automated **Abstract of Collection**.

The report shall consolidate collections according to the LGU's approved revenue classification and reporting requirements.

The system shall ensure that:

- Transactions are not duplicated;
 - Payments are correctly classified;
 - Revenue accounts are correctly identified;
 - Collection dates are accurate;
 - Cashier information is recorded;
 - Fund classification is correct; and
 - Report totals reconcile with actual recorded transactions.
-

XXI. ONLINE PAYMENT AND COLLECTION RECONCILIATION

For online payment transactions, the system shall provide reconciliation between:

Assessment → Payment Gateway → Treasury Collection → Receipt → Daily Collection

The system shall record:

- Payment reference number;
 - Gateway transaction number;
 - Amount;
 - Date/time;
 - Payment status;
 - Successful payment;
 - Failed payment;
 - Cancelled payment;
 - Refunded payment, where applicable; and
 - Reconciliation status.
-

XXII. ELECTRONIC BUSINESS PERMIT

The system shall provide electronic versions of approved business permits and applicable clearances/documents.

Each electronic permit should contain, where applicable:

- Business name;
- Business owner;
- Business address;
- Permit number;
- Business activity;
- Validity period;
- Date issued;
- Issuing office;
- Authorized signatory;
- QR Code or verification code; and
- Digital verification mechanism.

RA 11032 specifically provides that LGUs with electronic BOSS shall develop electronic versions of licenses, clearances, permits, certifications, or authorizations having the same level of authority, subject to applicable rules.

XXIII. QR CODE / ONLINE VERIFICATION

The system shall provide QR Code or equivalent verification functionality.

Authorized persons shall be able to verify:

- Permit number;
- Business name;
- Permit status;
- Date issued;
- Validity;
- Issuing LGU; and
- Other authorized information.

The verification page shall not expose unnecessary personal information.

XXV. TRANSACTION TRACKING AND PROCESSING TIME

The system shall automatically record timestamps for every major stage of a transaction.

For example:

Application Submitted → Received → Reviewed → Assessed → Evaluated → Approved → Paid → Released

The system shall calculate the processing duration and provide reports for management monitoring.

This feature shall help the LGU identify delays and monitor compliance with prescribed processing times.

XXVII. NOTIFICATION SYSTEM

The system shall provide notifications to applicants regarding:

- Application submission;
- Application received;
- Deficiency;
- Correction required;
- Assessment completed;
- Payment required;
- Payment received;
- Approval;
- Disapproval;
- Permit available;
- Permit released; and
- Other important transaction updates.

Notifications may be delivered through:

- Email;
 - SMS;
 - System notification;
 - Other authorized communication channels.
-

XXVIII. DASHBOARD AND MANAGEMENT INFORMATION SYSTEM

The system shall provide dashboards for authorized LGU officials.

Dashboard information may include:

- Total applications;
- New applications;
- Renewal applications;
- Pending applications;
- Approved applications;
- Disapproved applications;
- Paid applications;
- Unpaid applications;
- Total assessed amount;

- Total collected amount;
 - Daily collections;
 - Monthly collections;
 - Annual collections;
 - Revenue by source;
 - Rental collections;
 - Franchise collections;
 - Miscellaneous collections;
 - Processing time; and
 - Other management indicators.
-

XXIX. AUDIT TRAIL

The system shall maintain a comprehensive audit trail.

The audit trail shall record:

- User;
- Date/time;
- Transaction;
- Action performed;
- Previous value;
- New value, where applicable;
- IP/device information where appropriate;
- Approval/action;
- Payment activity; and
- Other significant system activities.

Audit records shall be protected against unauthorized modification or deletion.

XXX. DATA SECURITY AND DATA PRIVACY

The system shall implement appropriate security controls, including:

1. User authentication;
2. Role-based access;
3. Password security;
4. Session management;
5. Access control;

6. Encryption where appropriate;
7. Secure API communication;
8. Database security;
9. Backup and recovery;
10. Audit logging;
11. Protection against unauthorized access;
12. Data retention mechanisms; and
13. Appropriate safeguards for personal information.

The system shall comply with applicable provisions of the **Data Privacy Act of 2012** and related regulations.

XXXI. SYSTEM INTEGRATION AND API

The system shall be designed using an integration-ready architecture.

The developer shall provide secure APIs or other approved integration mechanisms for:

- Business Permit System;
- Treasury Collection System;
- Payment Gateway;
- SMS/Email service;
- QR verification;
- Other LGU systems; and
- Future national government integrations.

The API shall have proper authentication, authorization, logging, validation, and error handling.

XXXII. DATA MIGRATION

If existing business and collection data are available, the developer shall assist in migrating relevant historical data into the new system.

Migration shall include, where applicable:

- Business masterlist;
- Business owners;
- Business addresses;

- Line of business;
- Previous permits;
- Assessment records;
- Payment history;
- Taxpayer accounts;
- Rental records;
- Franchise records; and
- Other relevant data.

The developer shall conduct data validation after migration.

XXXIII. SYSTEM INTEROPERABILITY

The system shall be designed to allow future integration with applicable government systems, including systems of:

- DILG;
- DICT;
- DTI;
- BLGF;
- BFP;
- BIR;
- Other national government agencies; and
- Other authorized LGU systems.

RA 11032 recognizes the need for interconnectivity between government agencies and LGUs and provides for systems that facilitate the exchange of relevant business information.

XXXIV. SYSTEM PERFORMANCE

The system shall be capable of handling simultaneous users and transactions appropriate to the LGU's expected operational volume.

The developer shall ensure that:

- Pages load within reasonable response times;
- Database queries are optimized;
- Reports are generated efficiently;

- Multiple users can work simultaneously;
 - Transactions are not duplicated;
 - The system has proper error handling;
 - The system remains stable during peak transaction periods; and
 - System resources are monitored.
-

XXXV. BACKUP AND DISASTER RECOVERY

The developer shall establish appropriate backup mechanisms.

The system shall support:

- Automated database backup;
- Scheduled backups;
- Backup retention;
- Recovery procedures;
- Disaster recovery;
- Data restoration;
- Backup monitoring; and
- Business continuity measures.

The LGU shall have access to its own data and shall not be dependent solely on the developer for retrieval of government records.

XXXVI. TECHNICAL DOCUMENTATION

The developer shall provide complete technical documentation, including:

1. System Architecture;
2. Database Design;
3. Entity Relationship Diagram;
4. Data Dictionary;
5. API Documentation;
6. System Administrator Manual;
7. User Manual;
8. Installation/Deployment Documentation;
9. Backup and Recovery Procedures;
10. Security Documentation;
11. System Configuration Documentation; and

12. Source Code/documentation as required by the procurement contract.

XXXVIII. USER TRAINING

The developer shall conduct training for designated LGU personnel.

Training shall cover:

- System administration;
- Application processing;
- Assessment;
- Approval;
- Payment;
- Treasury collection;
- Rental collection;
- Franchise payment;
- Reporting;
- User management;
- System configuration;
- Data security; and
- Basic troubleshooting.

Training shall include actual hands-on exercises.

XXXIX. IMPLEMENTATION AND DEPLOYMENT

The developer shall be responsible for the deployment of the system into the approved production environment.

Implementation shall include:

1. System installation/deployment;
2. Database setup;
3. Configuration;
4. Data migration;
5. Integration setup;
6. User account creation;
7. Security configuration;
8. Testing;

9. UAT;
 10. Training;
 11. Production launch; and
 12. Post-implementation support.
-

XL. MAINTENANCE AND TECHNICAL SUPPORT

The developer shall provide technical support and maintenance during the agreed warranty/support period.

Technical support shall cover:

- System bugs;
- Database issues;
- Integration problems;
- Security issues;
- Report problems;
- Performance problems;
- User access issues;
- System errors; and
- Other defects attributable to the system.

Critical system issues affecting business permit processing or Treasury collection shall be given priority.

XLI. SOURCE CODE AND SYSTEM ACCESS

The procurement contract shall clearly define the rights of the LGU concerning:

- Source code;
- Database;
- System documentation;
- APIs;
- Configuration files;
- Deployment environment;
- Domain;
- Hosting;

- Credentials;
- Encryption keys, where applicable;
- Backup files; and
- Other system assets.

The developer shall provide the LGU with sufficient technical access and documentation to prevent unreasonable vendor lock-in.

XLII. SECURITY AND CONFIDENTIALITY

The developer shall treat all LGU information as confidential.

Personnel assigned to the project shall be required to observe applicable government policies concerning:

- Data confidentiality;
- Information security;
- Data privacy;
- Access control;
- Password management;
- Government records; and
- Proper handling of personal information.

Any unauthorized disclosure, extraction, copying, or use of LGU data shall be subject to applicable contractual and legal remedies.

XLIII. EXPECTED PROJECT OUTCOME

Upon completion, the LGU is expected to have an integrated digital platform capable of providing:

**Online Business Application → Assessment → Evaluation → Approval → Payment
→ Treasury Collection → Permit Release → Reporting**

while simultaneously supporting:

Miscellaneous Fees → Collection → Daily Collection → Abstract of Collection

Government Stall Rental → Assessment → Payment → Collection Monitoring

Franchise Payment → Assessment → Payment → Collection Monitoring

The resulting system shall provide the LGU with a centralized and auditable source of information for business permitting and local revenue collection.

XLIV. SUCCESS INDICATORS

The project shall be evaluated based on the following indicators:

1. Reduction in manual encoding;
 2. Reduction in repetitive submission of information;
 3. Reduction in processing time;
 4. Increased availability of online transactions;
 5. Improved application tracking;
 6. Accurate assessment;
 7. Accurate collection recording;
 8. Accurate Treasury reconciliation;
 9. Timely generation of collection reports;
 10. Improved transparency;
 11. Improved accountability;
 12. Reduced errors in collection reporting;
 13. Improved management monitoring;
 14. Increased accessibility of government services; and
 15. Compliance with applicable RA 11032 and ARTA requirements.
-

XLV. WARRANTY

The developer shall provide a warranty period of **[__] months** from the date of final acceptance.

The warranty shall cover correction of system defects, errors, and failures attributable to the developed system.

The developer shall not charge additional fees for correcting defects covered by the warranty.

XLVI. GENERAL REQUIREMENTS

The system shall be:

- Web-based;
- Secure;
- Scalable;
- Maintainable;
- User-friendly;
- Mobile-responsive;
- Integration-ready;
- Audit-ready;
- Capable of supporting multiple users;
- Capable of generating configurable reports;
- Capable of maintaining historical records; and
- Designed to support future expansion of LGU services.

The system shall be developed based on the approved requirements of the LGU and shall not rely on undocumented processes or proprietary mechanisms that prevent the LGU from accessing its own data.

XLVII. CONCLUSION

The proposed **Online Business Permit and Licensing System with Treasury Integration** shall serve as a major component of the LGU's digital transformation program.

The project shall not merely automate the existing manual process but shall **streamline and redesign the business permitting and revenue collection processes** to support the objectives of RA 11032, including efficient government service delivery, transparency, reduced processing time, simplified requirements, electronic transactions, and improved accountability.

The integration of the Business Permit and Licensing System with the Treasury Collection System shall establish a continuous transaction flow from **application and assessment through payment, collection, reconciliation, and reporting**.

The system shall further provide a foundation for expanding digital revenue services, including **Daily Collection of Miscellaneous Fees, Government Stall Rental, Franchise Payments, Business Permit Collections, and other authorized LGU revenue transactions**.

The project shall ultimately provide the LGU, its businesses, taxpayers, and other stakeholders with a more efficient, transparent, accessible, secure, and accountable government service delivery platform.
